

VARTON

About the company

Every day company "Varton" proves that the introduction of new technologies is necessary and the use of high-quality and durable materials is much more important than excessive reduction in production.

The company has production facilities in Russia. We provide the best quality of our products due to modern equipment and high-class element base.

Production site

VARTON is a certified partner who will support you in creating both standard and individual projects around the world. From professional lighting solutions to production goods in our own factory - we will be able to fit even non-standard requirements.

1 PRODUCTION OF METAL CASES

10,000 cases per day
3 automatic production lines
200 different models per day
Automatic production planning system

2 AUTOMATIC CONVEYOR PAINTING LINE

3 m per minute - painting speed
Painting chamber and Gema automatic guns
Raw materials: Jotun, AkzoNobel, Henkel

3 PLASTIC MOLDING PLOT

6000 items per day
3 Automatic molding machines
Robotic production
Delale production 20-1000 g, size up to 1.2 m

4 ALUMINUM PROCESSING

500 items per day
Use of machine tools with software control
High precision machining and repeatability of items
Processing of various aluminum profiles

5 ASSEMBLY WORKSHOP

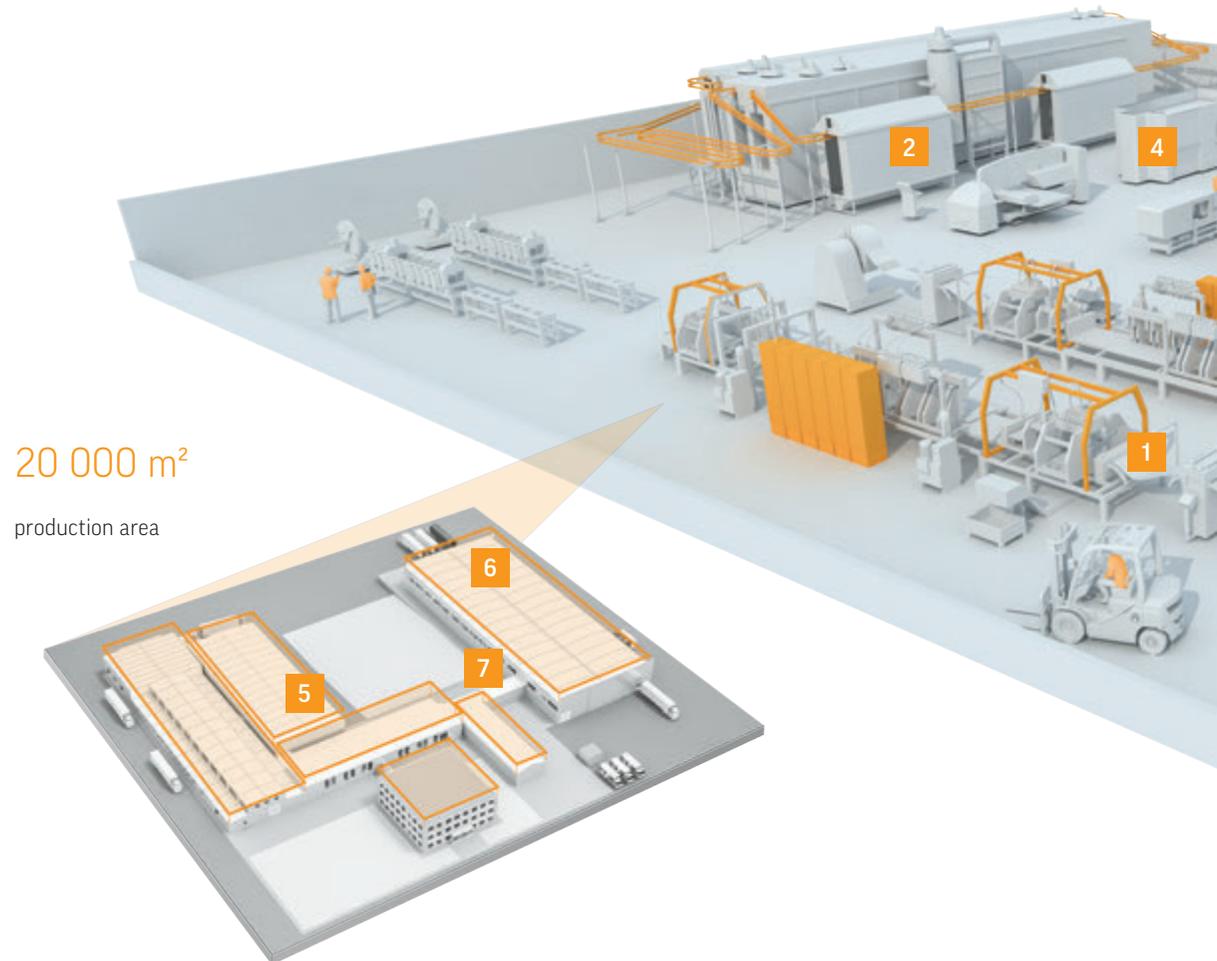

Electronic accounting system of finished products
Individual labeling of all products
100% quality control

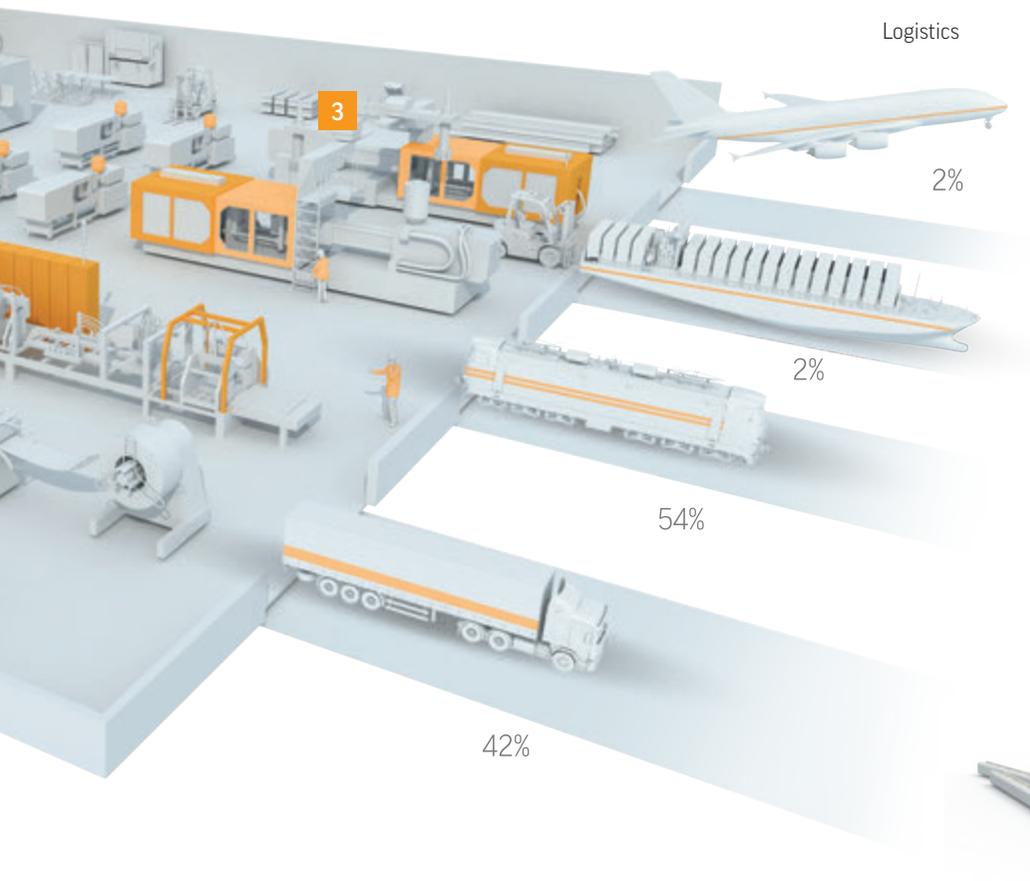

6 WAREHOUSE

6000 m² of storage space
Automated storage and order matching system WMS

7 LABORATORY

Modern high-precision equipment Researches: light characteristics, CCT, IP, EMC, UGR, IK, light intensity curve, etc.

Quality Management System certified according to ISO9001 requirements

15 000

luminaires produced in a day

17 seconds

Global suppliers

Manufacture of metal cases

- ▶ **10 000 cases per day**
- ▶ 3 automatic production lines
- ▶ 200 different models per day
- ▶ Automatic production planning system

Automatic conveyor painting line

- ▶ **4 m per minute painting speed**
- ▶ Painting booth and Gema automatic pistols
- ▶ Raw materials: Jotun, AkzoNobel, Henkel

Plastic casting area

- ▶ **6000 items per day**
- ▶ 3 Automatic Molding Machine
- ▶ Manufacturing parts 20-1000 g, size up to 1.2 m
- ▶ Use of robots in production

Aluminum processing

- ▶ **500 items per day**
- ▶ Use of machine tools with software control
- ▶ Precision machining and repeatability of products
- ▶ Processing of various aluminum profiles

Assembly workshop

- ▶ **50 series of products produced per day**
- ▶ Electronic accounting system of released products
- ▶ Individual labeling of all products
- ▶ 100% quality control

Warehouse

- ▶ **6000 m² of storage space**
- ▶ Automated storage and order picking system WMS 6000 m²

Laboratory

- ▶ **Modern precision equipment**
- ▶ Research: light characteristics, CCT, IP, EMC, UGR, IK, light intensity curve, etc.

Certification and quality

The quality management system of the VartonGroup corresponds to international standard ISO 9001: 2015. Technical control department supervises all stages of production.

Certification under the Customs Union (CU), EAC marking. Lighting products manufactured by the Varton Group of Companies pass mandatory confirmation of safety compliance according to the Technical Regulations of the Customs Union:- TR CU 004/2011 "On the safety of low-voltage equipment", approved by Decision of the Commission of the Customs Union (CCU) on August 16 2011 № 768.- TR TS 020/2011 "Electromagnetic compatibility of technical means ", approved by the Decision of the Commission of the Customs Union (CCU) on 9 December 2011 N 879. Conformity of manufactured products assessment to requirements of technical regulations of the Customs Union carried out before its released into usage. Documents of compliance are issued in accordance with the Decision of the Board of the Eurasian Economic Commission on 25 December 2012 №293 "On the unified forms of the certificate of conformity

and the declaration of compliance with the technical regulations of the Customs Union and their rules registration". The requirements of regulatory documents on sanitary-epidemiological and hygienic rules and regulations are strictly followed during production. Tests are conducted regularly by accredited laboratories of the Russian Federation. The products also undergo voluntary certification of fire and environmental safety.

Certification in the European Union (EU), CE marking. All lighting products supplied to the European Union (EU) are subject to conformity assessment with the requirements of the relevant EU Directives and are marked with CE sign. Testing on the harmonized European standards (EN) is carried out in accredited laboratories of EU countries, conformity assessment in the notified bodies, in particular, related to the German concern TUV NORD AG. Our products meet the requirements of: 2014/30/EU (Low Voltage Directive-LVD), 2014/35/EU (Electromagnetic Compatibility-EMC), 2011/65/EU (Restriction of Hazardous Substances), 2002/96/EU (Waste Electrical and Electronic Equipment Direc-

tive-WEEE), 2011/65/EU (Restriction of Hazardous Substances - RoHS). There is own lighting laboratory located on the production territory which allows a full range of lighting tests, EMC, and tests for dust and moisture protection (IP) of luminaires, degradation tests, climate tests, impact tests, vibration, etc.

Company "Varton" is the official partner of Dialux. You can always find relevant data on our luminaires in the Dialux plug-in.

Features and benefits of VARTON LED luminaires

- ▶ The case of Tornado luminaire is made of aluminum by method of injection molding.
- ▶ The luminaire uses efficient degradation-resistant LEDs and reliable and time-tested drivers.
- ▶ The design of the luminaire allows you to use a widerange of lenses, achieving the light distribution required in a particular case.
- ▶ Universal bracket allows you to install the luminaire in the console as well as in the floor lamp position and also carry out a fine adjustment of the angle of the lamp.

- ▶ Tempered silicate glass reliably protects optical compartment from mechanical impact. Impact resistance of glass corresponds to IK09 according to IEC 62262:2002.
- ▶ Access to the driver compartment is carried out without a tool. The driver of the lamp is installed on the plate allowing to carry out.
- ▶ The voltage breaker allows safe access to the driver compartment without dismantling the luminaire.
- ▶ The luminaire is equipped with lightning protection with an exclusive level of withstanding voltage (12kV).

- ▶ Structurally the luminaire is divided into two temperature-independent cameras: the light compartment and the driver compartment. This separation minimizes the thermal effect of the driver on the LED module.
- ▶ The lamp has a high level of dust and water resistance. The degree of protection of the product is provided by the shell according to GOST 14254 - IP66).
- ▶ Pressure equalization valve prevents the appearance of moisture on the internal parts of the lamp.

-  Kitchens
-  Cleanrooms
-  Sport halls
-  Airports
-  Railway stations

-  AWADA Smart light
-  Emergency execution
-  Luminaires with a minimum level of visual discomfort
-  Dual illumination
-  Dimmable version of the protocol 1-10V
-  Version with microwave motion sensor
-  Dimmable version
-  Dimmable DALI protocol version
-  Low voltage version

-  Requirements of the letter of the Head of Rosпотребнадзор, G.G. Onishchenko from 01.10.2012 No. 01/11157-12-32 «On the organization of sanitary supervision over the use of energy-saving light sources»
-  SanPiN 2.4.2.2821-10 «Sanitary and epidemiological requirements for the conditions and organization of training in educational institutions» (with changes as of 25 December 2013);
-  SanPiN 2.2.1/2.1.1.1278-03 «Hygienic requirements to natural, artificial and combined lighting of residential and public buildings»

SPECIFICATIONS

-  Unified sign of product circulation on the market of the Customs Union member states, confirming that the equipment complies with the mandatory requirements of the Technical Regulations
-  Confirmation of conformity of goods with GOST R 54350-2015
-  Proof of conformity of goods with the basic requirements of the EU

-  Mark of conformity of products with the standards of Ukraine in the certification system UkrSEPRO
-  Sign of compliance with a high level of environmental safety
-  The company has implemented and successfully applied a quality management system at all stages of production and sales of products and services that meets the requirements of GOST ISO 9001-2015

-  Luminaires designed to be installed on the surface of normally flammable materials
-  Climatic version*
*asterisk indicates a limited temperature range
-  The degree of dust and moisture protection of the luminaires

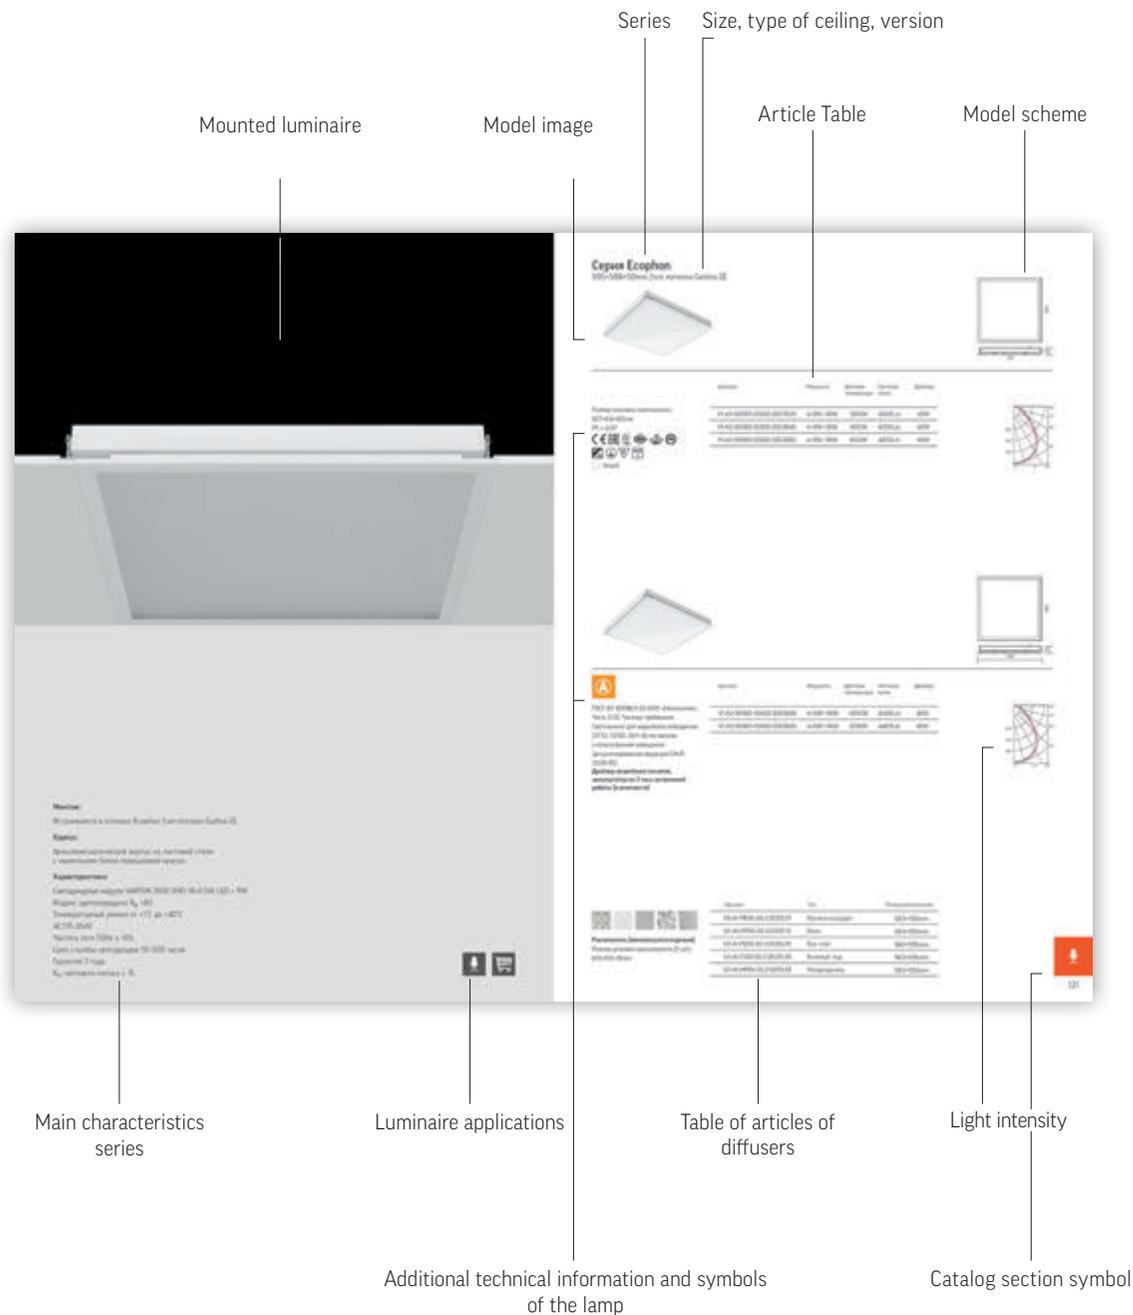

-  Sign of grounding, I class electrical safety from electric shock
-  II class electrical safety from electric shock
-  III class electrical safety from electric shock

AWADA Smart Light

AWADA lighting control system from Varton is an advanced proven protocol DALI based technology.

Why do you need it:

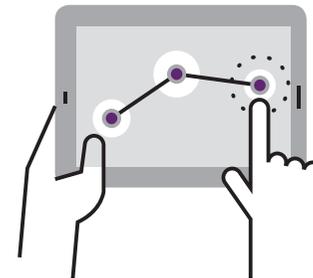

up to 85% of additional energy savings; creature of common control systems for all equipment in buildings (lighting, air conditioning, ventilation, video surveillance, etc.); comfort and high-quality light environment for work and life; contribution to environmental protection. Varton™ projects use equipment only from leading European companies and meet the most stringent requirements and pass all the necessary tests. Any Varton™ luminaire can be manufactured with the DALI protocol and/or with variable color temperature. With complex supplies of systems and equipment we guarantee the compatibility of all systems.

With the help of our experts you can get a solution for any project from small to large, from simple to complex, from economical to premium. The system can work both in manual and automatic mode; constantly maintain the same luminous flux, taking into account daylight; study in a short time and adjust to a specific room. The system may include various sensors and additional equipment working not only on DALI protocol, but also on other control protocols (ZigBee, KNX, etc.).

The first training systems for lighting control.

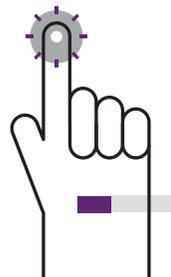

Simple and convenient interface

Automatic and manual control

Integration with the DALI system

Intuitive control on the 3D-scheme

Possibility of training the system

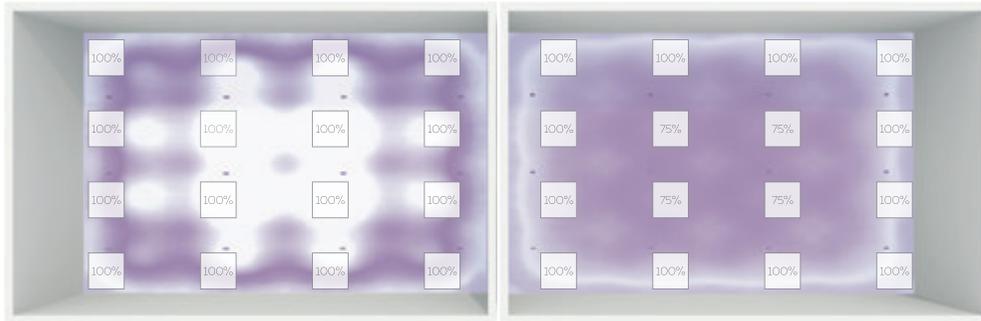

Cost control and management

Energy saving

Fine-tuning of illumination

The setting of scenes with dimming of each individual luminaire allows you to compensate for areas with excessive illumination, achieving optimal illumination of all space while reducing the overall energy consumption.

100% brightness of luminaires

Lamps with individually configured brightness

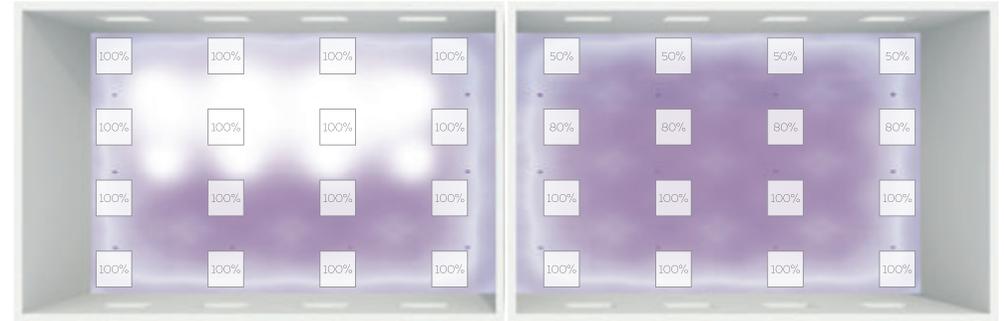

Intellectual presence control

The use of presence sensors, coupled with the AWADA learning function, allows you to create not only energy-efficient, but also comfortable lighting at the facility. Forget about the effect of traffic lights and steps into a dark room, turning off the light when you do not expect it. The system allows you to customize the behavior of lighting as you need, smoothly increasing the illumination in areas where there are people, and smoothly lowering it to the standby mode in empty rooms.

Use of daylight

With windows or skylights, sunlight is a great opportunity not to spend extra money. The system itself controls the desired level, providing the ability to manually adjust if necessary.

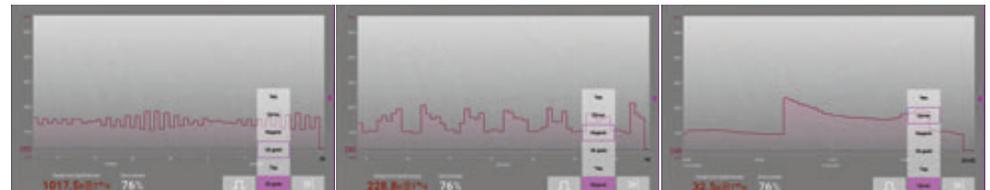

100% brightness of luminaires

The brightness of the lamps with the external light source

Real Time Monitoring

In the AWADA application you will not only see the current state of each lamp at the facility but you can also build energy graphs for any zone/floor/building for the period of time that interests you and upload this data in the Exel format.

NEW MODEL

Installation:

Outside / inside luminaire

Case:

Polycarbonate

Specifications:

Temperature range from +1°C to +40°C

AC220-240V

Network frequency 50Hz +/- 10%

Test button, charge indicator included

Application:

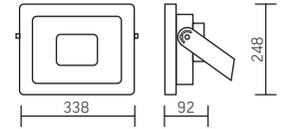

Together with LED lamps for emergency lighting

SPOTLIGHTS

Clear Diffuser

Matt Diffuser

Installation:

Mount directly on a horizontal or vertical surface
Can be mounted on hangers

Case:

High impact self-extinguishing ABS plastic
It is completed with wearproof cable input

Diffuser:

Polycarbonate with UV stabilizer additives
Mounted to the body of the lamp on the latches

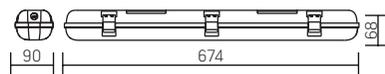

Specifications:

Index of color transmission $R_a > 80$
Temperature range from -40°C to $+45^\circ\text{C}$
LED life 50,000 hours
3 year warranty
Luminous flux $K_n < 2\%$

Installation:

It is mounted both on a flat surface and on hangers
Easy installation and connection due to the wires removed from the luminaire

Case:

Aluminum anodized body
Diffuser transparent PMMA (acrylic) in the version of Iron 2.0 Acryl
Opal diffuser in the version of Iron 2.0 Opal

Application:

For lighting livestock and poultry complexes
Industrial premises with high illumination requirements

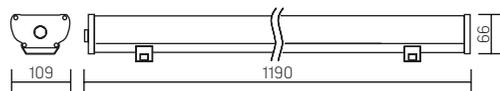

Specifications:

Index of color transmission Ra > 80
Temperature range from -40 ° C to + 45 ° C
LED life 50,000 hours
3 year warranty

Conformity:
 GOST IEC 60598-2-22:2012 – Luminaires. Part 2-22. Private requirements. Luminaires for emergency lighting » SP 52. 13330. 2011 "Natural and artificial lighting" (updated edition of SNiP 23.05- 95)

Installation:

It is mounted both on a flat surface, and on suspensions
 Convenient connection of the lamp, due to the presence of an external power cord

Case:

Aluminum anodized body
 Diffuser made of opal acrylic with high impact resistance and with high resistance to chemical and physical effects
 Special silicone pads to ensure compliance with IP67 protection class

Application:

Premises with high requirements for reliability of luminaires

Specifications:

Index of color transmission Ra > 80
 Temperature range from -40 ° C to + 45 ° C
 LED life 50,000 hours
 3 year warranty
 Luminous flux Kn≤ 1%

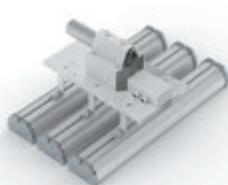

Mounts for LED luminaires of the Iron, Iron 2.0 and Iron Lens series.

V4-IO-70.0087.IRO-0001
Swivel mount (180 ° angle) for Iron luminaires Iron
192×45×80mm

Case: Galvanized steel
Mounting: Conveniently connecting luminaires using WAGO terminals in wiring boxes
Swivel mount is mounted on a flat surface of the ceiling or wall.
Angle of rotation 180 °, in increments of 15 °.
Allows you to adjust the angle of illumination of lamps in the premises of storage areas, industrial plants or in the open air
Installation on console with diameter from 40 mm to 50 mm

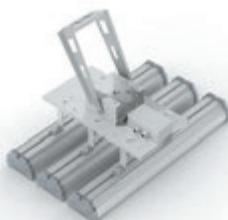

V4-IO-70.0003.IRO-0001
Console for 3 pcs. lamps 325×120×300mm

V4-IO-70.0003.IRO-0002
Console for 4 pcs. lamps 450×120×300mm

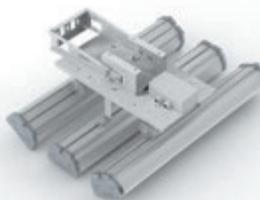

V4-IO-70.0003.IRO-0004
Suspension mount on eye-nuts, a set of two pieces

Installation:

Ceiling installation / wall thickness from 35 to 75mm

Case:

Aluminum anodized body, fasteners and removable decorative frame in painted steel

Secondary optics:

To protect the LEDs used secondary optics without the use of glass, which allows high energy efficiency 110 lm / W
Secondary optics made of acrylic resistant to physical and chemical influences

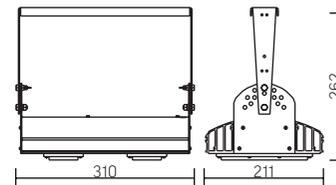

Specifications:

Index of color transmission Ra > 75
Temperature range from -40 ° C to + 45 ° C
AC100-305V, 47-63Hz, DC 142-431V
Network frequency 50Hz ± 10%
LED life 50,000 hours
3 year warranty
Luminous flux Kn ≤ 1%

Installation:

Fastening on walls, ceiling and floor with the ability to adjust the angle of inclination within 180 °

Case:

Aluminum anodized body

LED Protection:

To protect the LEDs, an acrylic cap without the use of glass is used, which allows high energy efficiency of 100lm / W

Specifications:

Index of color transmission Ra > 75

Temperature range from -40 ° C to + 45 ° C

AC100-305V, 47-63Hz, DC142-431V

Network frequency 50Hz ± 10%

LED life 50,000 hours

3 year warranty

Luminous flux Kn ≤ 1%

Installation:

Mount to console with a diameter of up to 48mm

Case:

Aluminum anodized body

Secondary optics:

To protect the LEDs used secondary optics without the use of glass, which allows high energy efficiency.

Secondary optics made of acrylic resistant to physical and chemical influences

Application:

Designed for general lighting of industrial and courtyard areas and industrial, warehouse and technical premises.

Specifications:

Index of color transmission Ra > 75

Temperature range from -40 °C to + 45 °C

AC100-305V

Network frequency 50Hz ± 10%

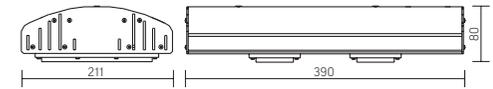

LED life 50,000 hours

NEW MODEL

Installation:

Mount on walls, ceiling and floor with the ability to adjust the angle of inclination within 180°

Case:

Aluminum anodized body

Application:

The lamp is designed for general lighting of industrial, warehouse and technical premises, as well as, outdoor areas, parking lots, building facades, architectural elements of buildings.

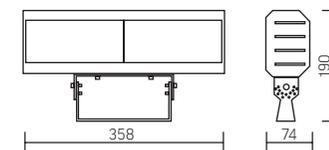

Specifications:

- Index of color transmission Ra > 75
- Temperature range from -40 °C to + 45 °C
- AC100-305V, 47-63 Hz, DC 142-431V
- Network frequency 50Hz ± 10%
- LED life 50,000 hours
- 3 year warranty
- Luminous flux ≤ 1%

Accessories for the Olymp Round lamp

Article	Description
V4-I0-70.0002.0LR-0001	Olymp Round swivel mount Used for surface-mounted installation of the lamp and the orientation of the lamp at a certain angle. Allows you to rotate the lamp in the range of -90° .. +90° in increments of 20°

Article	Name
V4-I0-70.0036.0LR-0001	Reflector Olymp Round 80° Designed to form a scattering angle of 80° and reduce the glare effect. Efficiency 82%. Attached to the lamp body with screws screwed into the rim of the lamp

NEW MODEL

Installation:

Mounted with suspension. Surface mounting is possible when using a swivel bracket (optional accessory).

Case:

Cast aluminum case. Strained glass.

Application:

The lamp is designed to illuminate industrial premises and production sites.

Specifications:

Index of color transmission Ra > 75

Temperature range from -40 °C to + 45 °C

AC100-305V, 47-63Hz, DC 142-431V

LED life 50,000 hours

URAN MINI

NEW
MODEL

Installation:
Mount to console with a diameter of up to 48mm

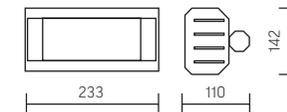

Case:
Aluminum anodized body

Application:
Designed for lighting sites with high demands on uniformity of illumination, such as parking, squares and squares.

Specifications:
Index of color transmission $R_a > 75$
Temperature range from -40°C to $+45^{\circ}\text{C}$
AC100-305V
Network frequency $50\text{Hz} \pm 10\%$
LED life 50,000 hours
3 year warranty
Luminous flux $K_n \leq 1\%$

Installation:

Console design for
pipe diameter 48mm
Adapter bracket
V4-S0-70.0003-TR0-0001
for mounting on pipe up to 60mm

Case:

Aluminum anodized housing with plastic end caps made of cold-resistant ABS plastic
Secondary optics

It is made with the use of light-distributing lenses to achieve a wide diagram in one plane, and a shift of the light flux to the roadway in another

Protective glass:

Made of tempered glass

Application

Designed for functional lighting of streets, courtyard territory, parking lots and roads with low, medium and high traffic (with the exception of the A1 class motorways)

Specifications:

Index of color transmission Ra > 75
Temperature range from -40 °C to + 45 °C
AC100-305V
Network frequency 50Hz ± 10%
LED life 50,000 hours
3 year warranty

Three-phase busbar Varton

Installation:

Suspended cable installation
Surface mounted on horizontal / vertical surface

Case:

Aluminum body white / gray / black

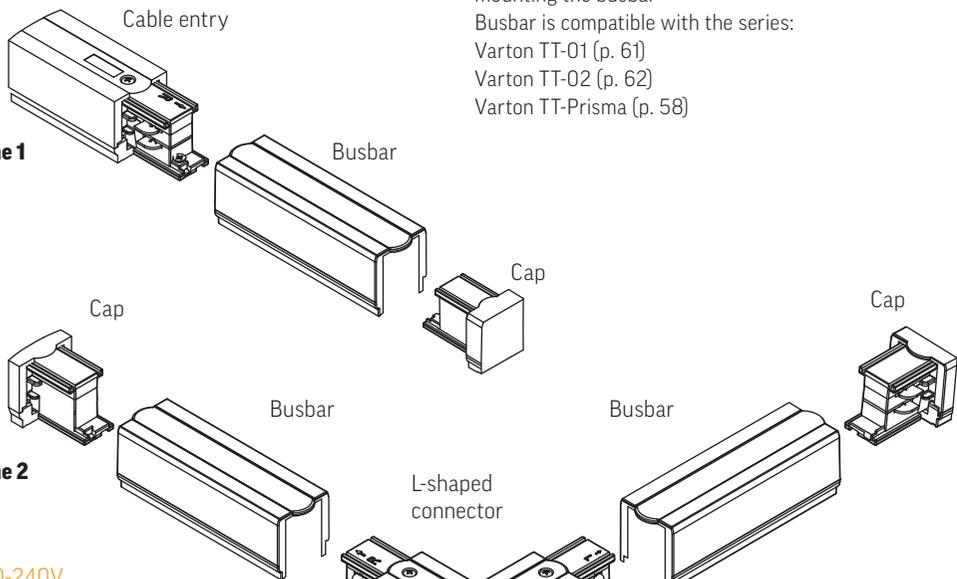

Specifications:

Maximum current per phase 16A
Maximum voltage per phase 230V
Maximum power per phase 3600W
2 year warranty
Available section lengths: 1m/2m/3m/4m **
** if necessary, you can cut off shorter pieces when mounting the busbar
Busbar is compatible with the series:
Varton TT-01 (p. 61)
Varton TT-02 (p. 62)
Varton TT-Prisma (p. 58)

The number of kits for surface mounting / suspension of a busline is calculated using the formula: the number of meters of construction +1. For example, to install a straight busbar line with a length of 2m you will need 3 sets for surface mounting / suspension of a busline.

Maximum load on a busline mounted on suspensions: 150H / m.

LINEAR RECESSED LUMINAIRES

Installation:
Due to the clamping system, the luminaires can easily be built into plasterboard ceilings
T-shaped, L-shaped and X-shaped light turns provide a continuous uniform line without unlit areas
Luminaire dimensions are not including end covers

Case:
Complete with all types of diffusers
Luminaire housing made of anodized aluminum profile

Application:
Suitable for various types of ceilings (plasterboard, Gilyato, etc.)

Specifications:
Index of color transmission Ra > 80
Temperature range from + 1 ° C to + 40 ° C
AC176-264V
Network frequency 50Hz ± 10%
LED life 50,000 hours
3 year warranty
Luminous flux Kn ≤ 1%

	V4-R0-70.0009.MIP-0001	Line Connection Kit
	V4-R0-00.0024.MIP-0001	Set of connectors for waterproof wire connections

NEW
MODEL

Installation:

Suspended installation
Surface Mounted through side covers

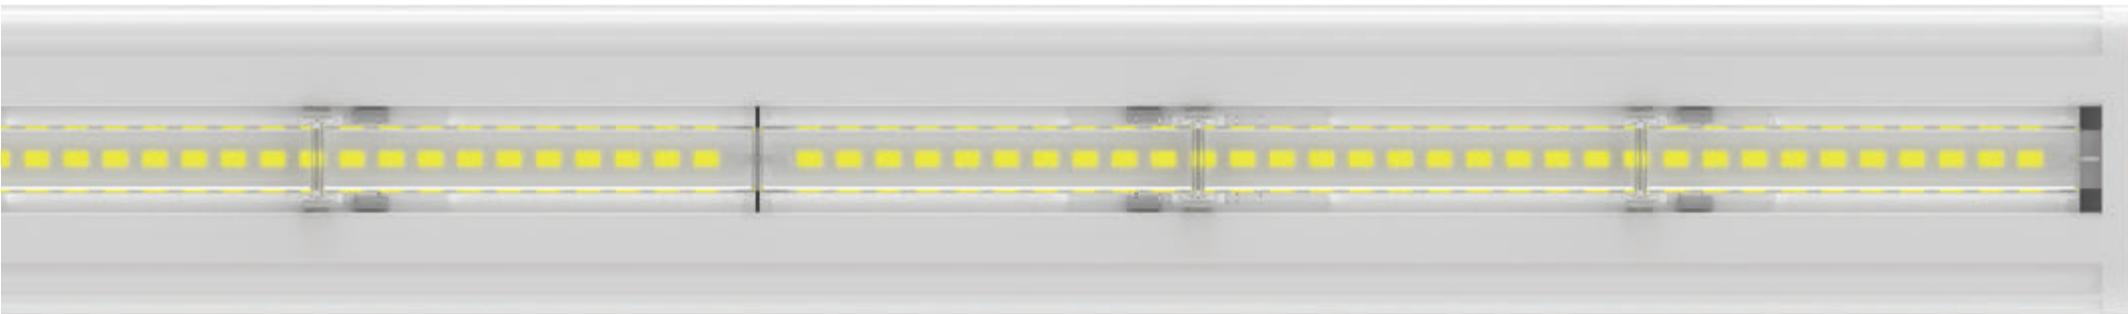

Material:

Aluminium case
Plastic side covers

Specifications:

Index of color transmission Ra > 80
Temperature range from + 1 ° to + 45 ° C
LED life 50,000 hours
3 year warranty
Luminous flux Kn ≤ 3%

Installation:

Mounting on suspensions, mounting on a flat surface, as well as the possibility of assembly in a line

Case:

Aluminum anodized body

Specifications:

Index of color transmission Ra > 80

Temperature range from + 1 ° C to + 40 ° C

Network frequency 50Hz ± 10%

LED life 50,000 hours

3 year warranty

Luminous flux Kn ≤ 1%

V4-R0-00.0012.SU0-0001	Connector X-shaped with a set of fixtures for lamps of the Supermarket series Prism

Prism

Installation:

Mounting on suspensions, mounting on a flat surface, as well as the possibility of assembly in line.

T-shaped, L-shaped and X-shaped light turns provide the ability to assemble complex geometric shapes.

Body Material:

Sheet steel coated with white powder paint

Specifications:

Index of color transmission Ra > 80
Temperature range from + 1° to + 40 ° C
Input voltage: AC176-264V
LED life 50,000 hours
3 year warranty
Luminous flux Kn ≤ 1%

GOST IEC 60598-2-22-2012 "Luminaires. Part 2-22. Private requirements. Luminaires for emergency lighting "SP 52. 13330. 2011" Natural and artificial lighting "(updated edition of SNiP 23.05-95)

Diffuser (optional)

Package size of the lens (2 pcs.):
1205×85×18mm

Article	Type	Diffuser size
V2-R0-PR00-00.2.0013.25	Prism standard	1170×64mm
V2-R0-ME00-03.2.0013.30	Opal	1170×64mm
V2-R0-PS00-00.2.0013.20	Pin spot	1170×64mm
V2-R0-C100-00.2.0013.20	Crushed ice	1170×64mm
V2-R0-MP00-02.2.0013.20	Microprism	1170×64mm

* Luminous Flux Set excluding the diffuser

Installation:

Mounting on suspensions, mounting on a flat surface, as well as the possibility of assembly in a line T-shaped, L-shaped and X-shaped light turns provide a continuous uniform line without unlit areas

Case:

Luminaire housing made of anodized aluminum profile

Application:

Designed for lighting commercial, office and administrative premises

Specifications:

Index of color transmission Ra > 80

Temperature range from +1 °C to +40 °C

AC176-264V

Network frequency 50Hz ± 10%

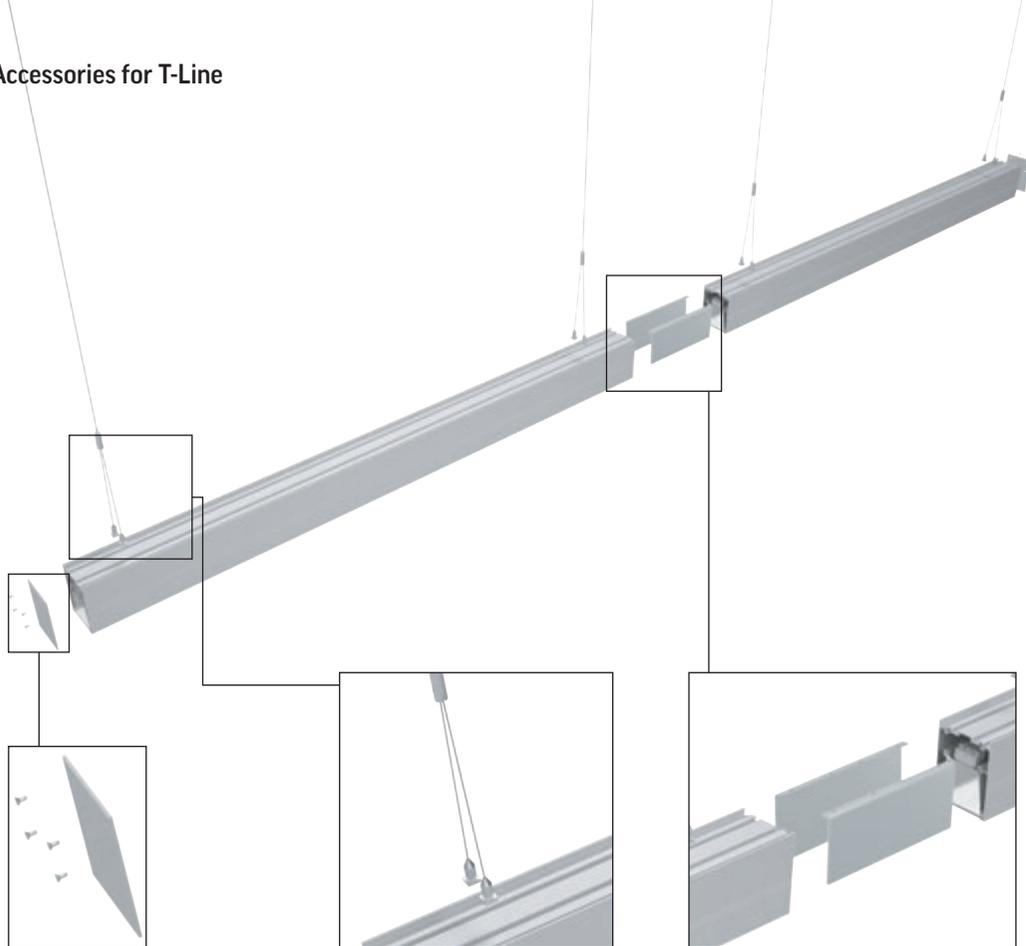

LED life 50,000 hours

3 year warranty

Luminous flux ≤ 1%

Accessories for T-Line

End cap deaf with a set of fasteners for lamps of the T-Line series

Diffuser:

Luminaires are equipped with tempered frosted glass diffuser

Application:

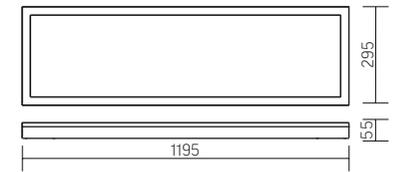

Lamps are suitable for installation in fire-hazardous premises of class P-IIa

Specifications:

Index of color transmission Ra > 80

Temperature range from -20 °C to + 40 °C

AC176-264V

Network frequency 50Hz +/- 10%

LED life 50,000 hours

3 year warranty

Luminous flux Kn <1%

V4-A0-70.0018.PNL-0002	Mounting kit for mounting panels in plasterboard ceilings v.2

Article	Name
V4-A0-70.0018.PNL-0003	Suspension kit for LED panels with adjustable cable height (maximum length 0,6m)

Installation:

Surface mounting, mounting included in the package
Embedded installation in suspended ceiling systems
Installation in the FCL (mounting kit is ordered separately)
Suspended installation (suspension kit ordered separately)

Case:

Aluminum

Diffuser:

Polystyrene

Specifications:

Index of color transmission Ra > 82

UGR <19

Temperature range from +1 °C to +40 °C

AC220-240V

Network frequency 50Hz +/- 10%

LED life 50,000 hours

3 year warranty

Luminous flux <1%

Light angle 90 °

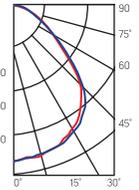

Panel 070
595×595×10mm

Package size of the lamp:
600×600×18mm
Power source package size:
160×50×50mm
PF ≥ 0,90

LD9365D2243	34W	4000K	3200lm
LD9365D1334	34W	6500K	3200lm

Driver included

Installation:

The luminaire is built into suspended ceiling systems.
The possibility of overhead execution (mounting included)
Additional mounts for mounting in the gypsum board are ordered separately.

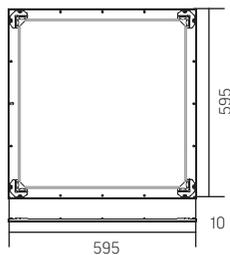

Case:

Luminaire housing made of anodized aluminum
Opal Diffuser
The power source is completed in a separate box.

Specifications:

Index of color transmission Ra > 80
Temperature range from + 1 ° C to + 40 ° C
Network frequency 50Hz ± 10%
LED life 50,000 hours
3 year warranty
Luminous flux Kn ≤ 5%

Diffuser (optional)
Pack size of diffuser (2 pcs):
1205×305×18mm

Installation:

Embedded in Armstrong suspended ceilings, mounted on a flat surface or cable trays

Case:

All-metal housing made of sheet steel with white powder coating

Specifications:

Index of color transmission Ra > 80
Temperature range from + 1 ° C to + 40 ° C
AC176-264V
Network frequency 50Hz ± 10%
LED life 50,000 hours
3 year warranty
Luminous flux Kn ≤ 1%

Installation:

Embedded in plaster-board ceilings (8-15mm)
 Necessary mounting hole for mounting the lamp 575 × 575mm
 Mount included

Case:

All-metal housing made of sheet steel with white powder coating

Specifications:

Index of color transmission Ra > 80
 Temperature range from + 1 °C to + 40 °C
 AC176-264V
 Network frequency 50Hz ± 10%

V1-A1-00352-10A00-2003650	36W	5000K	3200 lm

Installation:

Embedded in Armstrong® suspended ceiling systems
The lamp is made in the same style with Vector® ceiling tiles

Case:

All-metal housing made of sheet steel with white powder coating

Diffuser:

Opal PMMA included

Specifications:

Index of color transmission Ra > 82

Temperature range from + 1 ° C to + 40 ° C

AC176-264V

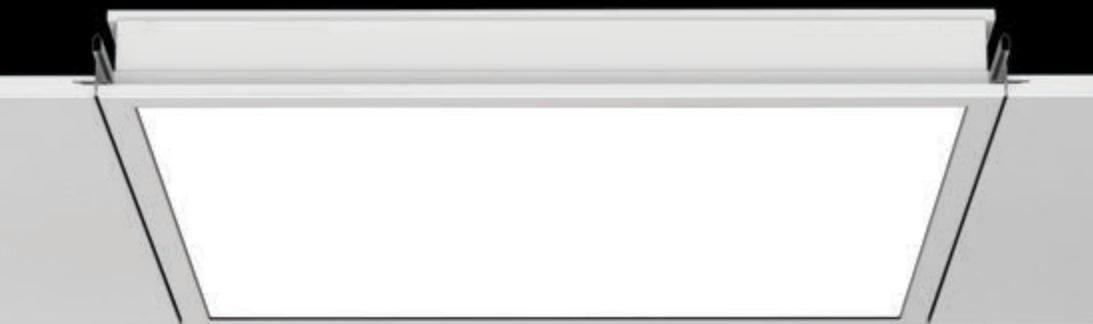

Network frequency 50Hz ± 10%

LED life 50,000 hours

3 year warranty

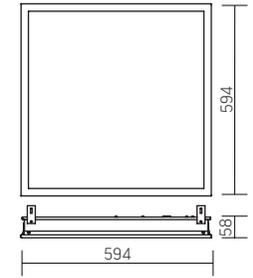

Luminous flux Kn ≤ 1%

Installation:

The lamp is installed in the grilyato ceilings with the height of the guides 30/40/50 mm

Case:

All-metal housing made of sheet steel with white powder coating

Diffuser:

Complete with opal or prismatic diffuser

Specifications:

Index of color transmission Ra > 80

Temperature range from + 1 ° C to + 40 ° C

AC176-264V

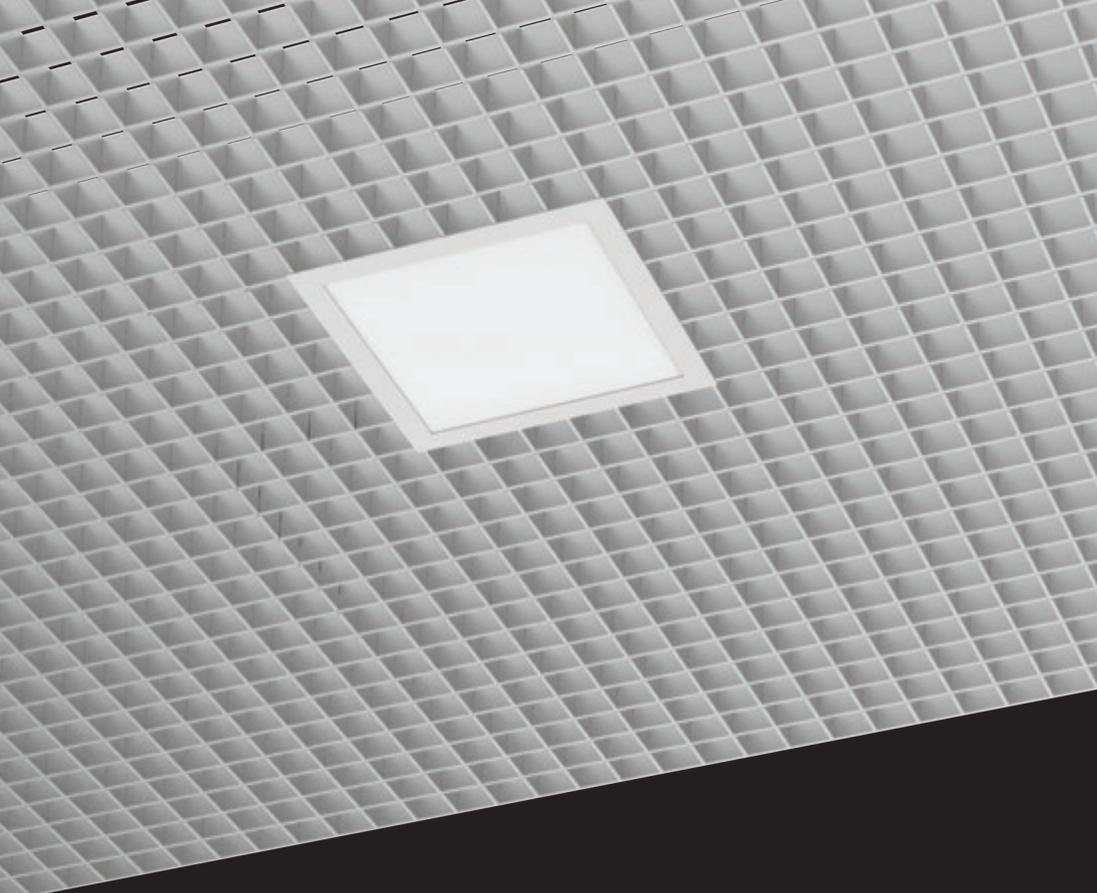

Network frequency 50Hz ± 10%

LED life 50,000 hours

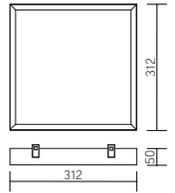

3 year warranty

Luminous flux ≤ 1%

C170/N			

EL1-ELn - lamps, where n is the number of connected lamps

SA - power switch

► Connection Type 4

EL1-ELn - lamps, where n is the number of connected lamps

SA - power switch, X1, X2, X4, X5 - terminal strips

With any type of connection the lamp has three operation modes:

1. Operating mode

Depending on the type of connection, the phase is present:

- on pins 2 and 3 of terminal block X1 (connection type 1)

- on contacts L of terminal strips X1 and X2 (connection type 2)

- on the red and brown wire (connection type 3)

- on pin 3 of terminal strips X1 and X2 (power supply by default

entered into phase L3) and contact L of terminal blocks X4 and X5 (type

connect 4)

at the same time all LED modules of the lamp give out 100%

light flux.

2. Emergency mode

Depending on the type of connection, there is no phase:

- on pins 2 and 3 of terminal block X1 (connection type 1)

- on contact L of terminal strips X1 and X2 (connection type 2)

- on the red and brown wire (connection type 3)

- on pin 3 of terminal strips X1 and X2 (power supply by default

entered into phase L3) and contact L of terminal blocks X4 and X5 (type

connections 4), while all the LED modules of the lamp provide 10% of the

luminous flux of nominal.

3. Battery charging mode

Depending on the type of connection:

- the phase on pin 2 is missing, the phase on pin 3 is present on the X1

terminal block (connection type 1)

- there is no phase on pin L of terminal strip X2, a phase on pin L of

terminal strip X1 is present (connection type 2)

- there is no phase on the brown wire, a phase on the red wire is present

(connection type 3)

- the phase on pin 3 of the terminal blocks X1 and X2 (by default, power

is applied to the phase L3) is absent, the phase on pin L

X4 and X5 terminal blocks are present (connection type 4), while the

LED modules do not glow and the battery is charged.

V90017	E40	900W	90W	6500K	8200lm	140×268mm

Body Material:

Aluminum / plastic

Application:

It is used for local, industrial and warehouse lighting; it is a replacement for LON, DRV and CFL lamps

Specifications:

E27 / E40 base

Index of color transmission Ra > 80

Temperature range from -20 ° C to + 40 ° C

Network frequency 50Hz ± 10%

LED lifetime 30,000 hours

1 year warranty

LED lamps for local lighting (12V, 24-36V, 127V)

60x110mm / 60x125mm

Body:

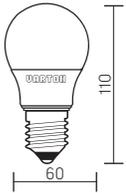

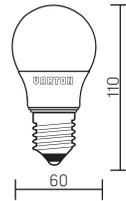

A60 lamp

Application:

It is used for local illumination of working areas, equipment and machine tools in workshops at production sites, as well as on ships and construction sites.

Specifications:

E27 base
 Index of color transmission Ra > 80
 Pulsation level <1%
 Temperature range from +1 °C to +40 °C
 Network frequency 50Hz ± 10%
 LED lifetime 30,000 hours
 1 year warranty

A Autonomous emergency lamp permanent action

Emergency power supply unit, battery for 1 hour of autonomous operation, charge indicator, "Test" button in the set (see description on page 266)

Conformity:
 GOST IEC 60598-2-22-2012 "Luminaries. Part 2-22.
 Private requirements. Luminaries for emergency lighting "SP 52. 13330. 2011" Natural and artificial lighting "(updated edition of SNiP 23.05-95)

Installation:

It is mounted both on a flat surface, and on suspensions
 Easy installation and connection due to the wires removed from the lamp housing

Case:

Aluminum anodized body
 Diffuser transparent PMMA (acrylic), resistant to UV radiation and exposure to specific media in agriculture
 Special silicone pads to ensure compliance with IP67 protection class

Application:

For lighting livestock and poultry complexes
 Industrial premises with high illumination requirements

Specifications:

Index of color transmission Ra > 80
 Temperature range from -40 °C to + 45 °C
 LED life 50,000 hours
 3 year warranty
 Luminous flux Kn ≤ 1%

V1-IA-70155-03L17-67070RB	70	140	KCC type oblique light

Application.

For lighting greenhouses

Installation:

Fastening on walls, ceiling and floor with the ability to adjust the angle of inclination within 180 °

Case:

Aluminum anodized body

Secondary optics:

To protect the LEDs used secondary optics made of acrylic, resistant to physical and chemical influences

Specifications:

Photosynthetic flow: 97-514 $\mu\text{mol} / \text{s}$

Operating temperature: -40 ° C to + 45 ° C

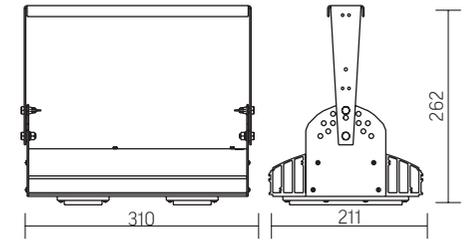

AC100-305 V, 47-63 Hz, DC142-431 V

LED life 50,000 hours

Luminous flux $\leq 1\%$

3 year warranty

Project Opportunities

The Varton Group of Companies carries out project activities in various areas:

- ▶ development of the lighting concept;
- ▶ participation in the development of draft design;
- ▶ calculation of illumination on objects;
- ▶ participation in the preparation and implementation of the working draft;
- ▶ development of a comprehensive lighting project;
- ▶ consultation in the application of lighting.

GC "Varton" has considerable experience in the preparation and implementation of lighting projects of various levels of complexity at outdoor lighting facilities, highways and park areas, shopping and entertainment complexes, car dealerships, housing and public utilities facilities, industrial and warehouse buildings, sports and educational institutions and etc.

In the course of its activities, the Varton Group of Companies relies on the Federal Law No. 184-F3 of December 27, 2002 – On Technical Regulation (as amended on July 28, 2012, with amendments that entered into force on July 30, 2012). The projects use lighting equipment of its own production, which is subject to mandatory and voluntary certification in Russia. Products "Varton" successfully passed the environmental test and, according to experts, has a high level of safety and a certificate of "Eco-seal" for reconstructed buildings.

Lighting reorganization at the facilities is carried out in accordance with Federal Law No. 261-F3 of 11.11.2009 – On Energy Saving and Energy Efficiency Improvement and on Amendments to separate legislative acts of the Russian Federation ". GC "Varton" produces and delivers energy-saving LED equipment, the use of which reduces energy consumption at the facilities, without affecting the general characteristics of illumination and in some cases improving the quality of lighting.

Specialists of the Varton Group of Companies accompany projects at all stages of work: from preliminary studies and lighting calculations to the stage of installation supervision. The work is based on accurate calculations for a particular room. Calculations are carried out in accordance with the legal and medical standards for illumination, features of the building, its purpose and customer requirements.

Technical and software bases allow solving problems of equipping both buildings under construction and reconstructed buildings.

In both cases, computer simulations, creating layouts and 3D visualizations of objects are used with the help of which the algorithm for constructing a project becomes more clear for the contractor and the customer. When working with newly erected buildings, the client provides the necessary drawings of the premises, architectural models and floor plans. During the reconstruction of the premises, the specialists of the project department, if necessary, travel to the object for examination, calculate the illumination and draw up a list of recommendations on equipment, on the basis of which the future project is created.
